

Welcome to Free **Traffic** Monster

Disclaimer

I cannot guarantee you or anyone else any specific results or amounts of money that will be made with this method, if any. The method is working for me but it does not mean it will work for you or anyone else, especially if you are not willing to put in the time and effort to make it work. With that being said, there is a great potential in this method but it really depends on the hours you are willing to put in, your work ethic and even luck...

I'd also like to note that some of the links in this eBook are affiliate links and I do enjoy the commissions but I want to stress that, I'm using all of the products I'm recommending myself and I'd never recommend anything that is not worth much more than the price for it to you!

Hey there and Welcome to Free **Traffic Monster!**

First of all I'd like to congratulate you! You've taken action and it was a wise decision on your part – investing in yourself and learning more whenever you can is the most important thing when it comes to your online success.

I'm excited and you should be as well because what you've invested today will come back to you multiplied very soon, if you'll do everything correctly...

Who am I?

My name is **Art** (that's me and my beautiful daughter below ☺), I live in Portugal and I'm lucky enough to say that today internet marketing is my "job".

For years I was working as a **bartender** but always had a dream about creating an extraordinary life not only for me but for my family as well... I started making money online in 2007

and back then I was doing mainly translation and proofreading jobs. I did “ok” but after about two years I realized that there’s a ceiling to what I’ll be ever able to make this way, since I was **exchanging my time for money**... It wasn’t very high and that’s why I decided to move on and look for something that I can actually create a **real online business** with!

I tried to make money with different Internet Marketing business models (blogging, ppc, ptc, flipping domains, niche mini sites etc) but **nothing seemed to work for me**... For quite some time I was jumping from one thing to another, never really mastering anything and making barely anything at that point!

Fortunately, after some time I managed to put my mind into it and finally did figure things out on my own... I’m treating the money I’ve lost in the process as an investment in myself – I’ve really learnt a lot, mainly about things that **Do NOT** Work 😊

In my early internet marketing days I didn’t have a lot of money to invest and that’s why **I had to** focus on finding new and creative ways of bringing in **Free Traffic**...

After multiple tries and errors with different Social Media sites I finally found something that was working for me and today I want to share all of my secrets with you...

Ok, enough of the introductions - let’s jump straight into the course!

Why Free Traffic?

Free Traffic is great because... it's **Free!** 😊

Some people argue that it's not really free because you have to sacrifice quite a bit of time in order to make it work – and time is money as we all know.

I agree with that to a certain extent – yes, it is hard to build a large Twitter following (as an example) and be keeping everything up to date and engaging your followers regularly... but there are **other ways** to get Free Traffic that are not as time consuming and don't require so much dedication on your part.

What I'm going to share with you here is a bit different and has nothing to do with Social Media – you **won't** need much time to make it work at all and once you'll have everything in place, it'll be super easy!

The traffic that you'll be getting is actually low paid traffic but I've figured out a way to get it **for free** 😊

What is it? Read on – I'll be sharing it in the next chapter...

What's the idea?

You've probably heard about **Safe Lists**, right?

These are sites like [State Of The Art Mailer](#) that allow you to email hundreds or thousands of people at a time (exactly like a solo ad) with your offer – **but not only that** – you can also get free banner ad space, free traffic links and other free traffic options!

Normally there's a monthly fee that allows you to mail a certain amount of people per month and the prices range from a few dollars a month to a few hundred dollars a month, depending on how many people you want to email...

However, I've figured out a way to mail (and not only) this way **for Free!**

I normally wouldn't pay for traffic from safe lists – but if the traffic is free than I'll take it any day of the week!

You can send this traffic **anywhere you want** – to your free or paid offers, affiliate offers, CPA offers, Pay-per-Lead programs or even to your new blog post if you want... and since it literally takes minutes to set up, you're not really sacrificing anything 😊

How this works?

Most Safe List sites will give you a **free coupon** on sign up, so you can try out their traffic... This can give you a variety of traffic options, depending on the coupon and the site but typically it is a free solo ad, a free banner space, a free traffic link or something similar.

Of course these sites are **tracking** your IP address and email address and once you're going to use these coupons, you're done. If you want to continue using the site after that and keep on getting traffic, you simply have to pay!

Well, I've found **a way around** that but before you'll start implementing this strategy, I want you to start using these sites and the free coupons, so you have an idea of how it all works.

FIRSTLY – you'll **have to** create a new email address. Don't use your existing email addresses because after signing up you'll start receiving daily emails from these sites. You don't want to deal with tens and even hundreds of emails a day jamming your inbox, so just create a new email account which you'll

20,000 points
3 sonic solo ads
3 banners
3 traffic links
Promo code:
signmeup
Bonus Codes:
monster
InfinityP

As an example - the one above will give you 20,000 points, 3 sonic solo ads, 3 banners and 3 traffic links – **all for Free!**

Let's join one, just to give you an idea of how **simple** the whole process is...

The Safe List I'm joining here is called Got Safelist and after landing on their homepage you'll see this:

Testimonials
"I belong to a lot of safelists because it's essential for marketing my business. But this is the only safelist that I have seen that will actually give you credits month after month."

NOTE – you **don't** have to put in your PayPal email here!

After you'll sign up, you'll have to go to your inbox and confirm the subscription...

Click on the confirmation link and you'll be taken back to their site, where you'll see this box on your left:

Now we can spend the 10,000 credits on Safelists Ads, Online Ads and Solo Ads...

Let's check out the Online Ads first:

Post your **ONLINE** Safelist Ads

This is our ONLINE version of our famous Safelist Ads system. Now your safelist ad will be posted on our website in our "Online Safelist Ads" page for our members to read and click for credits.

Like our emailed safelist ads, readers are required also visit your hotlink site(s) and stay for 3 seconds!

As a **FREE** member you are allowed to post **1** ONLINE safelist ad per day.

Upgrade to our **GOLD** membership to be able to post **10** ONLINE safelist ad per day.

Instructions:

If you would like to send a saved ad, please select the ad from the drop down box "Choose Saved Ad". You may change the subject of the message and/or the message itself.

1. Select the message type. HTML or Plain Text.
2. Choose a Hotlink Site. Readers will be auto redirected to your Hotlink Site(s). This is **GUARANTEED Traffic**, don't forget to use this feature!
3. Type in your subject. **Remember! You can insert their name and other variables! (See below)**
4. Type in your message. **You can insert variables here too!** We limit the message to 15,000 characters
5. Please read our rules regarding what is unacceptable to send out.
6. If you would like to preview your ad you can click "**Preview Ad**"
7. If you wish to **Save** the ad, simply check the checkbox "**Save Ad**".
8. Click "**Send**" to send it out.

For the safety and security of you and other members we do not allow the following tags:

As you can see, you can post **1 Free Ad per day** and they have detailed instructions on how to post your ad!

You can set these up or not – totally up to you...

Let's check out the Safelist Ads:

Email advertising won't get any better than this! Send your Ads to every subscriber of our safelist and never ever have to worry about SPAM complaints. Every subscriber in our list are double optin.

Subscribers will not only open your emails but they will also visit your hotlink site(s) and stay for 10 seconds!

Instructions: 

If you would like to send a saved ad, please select the ad from the drop down box "Choose Saved Ad". You may change the subject of the message and/or the message itself.

1. Select the message type. HTML or Plain Text.
2. Choose a Hotlink Site. Readers will be auto redirected to your Hotlink Site(s). This is **GUARANTEED Traffic**, don't forget to use this feature!
3. Type in your subject. **Remember! You can insert their name and other variables! (See below)**
4. Type in your message. **You can insert variables here too!** We limit the message to 15,000 characters
5. Please read our rules regarding what is unacceptable to send out.
6. We allow you to choose how many credits you want to use in case you are wanting to save them for whatever reason. In that case, you can alter the number before you send it. The number of credits to use can never be greater than the number of people in the list. If you type in a greater number than people in the list, it will only be sent to the number of people in the list.
7. If you would like to preview your ad you can click "**Preview Ad**"
8. If you wish to **Save** the ad, simply check the checkbox "**Save Ad**".
9. Click "**Send**" to send it out.

With this option, you're sending emails to the subscribers of the site and they will have to see your email for at least **10 seconds!** Again, they have detailed instructions on how everything works.

The important thing to remember is that **each Safe List site is different** and with each one you'll get a different Free Traffic option...

If you want to get some fast traffic, I'd focus on the ones that allow you to send **Free Solo Ads** first!

After you'll use all of these, you can go ahead and start adding banners and traffic links.

What works best?

You can **send** the traffic you'll be getting anywhere you like – your own offers, affiliate offers, cpa pffers, pay-per-lead programs, your blog, your videos etc...

BUT if you want to **MAXIMIZE** your results, you need to think about the people that will be clicking on your ads and what are they looking for!

These people are using these Safe List sites for a specific purpose – **getting free traffic** and wanting to **make money online**.

Keep that in mind when choosing the offer you're going to promote on these sites!

You have a few options of where you can send all this traffic to:

- **A \$1 dollar product of yours** – if you're focusing your efforts on building a Buyers List than the best option would be to send all the traffic to a low priced (\$1 is the best working option here) product of yours, so you can weed out the freebie seekers and only get buyers leads in!

- **A freebie with a \$1 upsell** – if you want to build your list faster and you don't mind having freebie seekers on there, you can grow it that way. The people that will opt-in for the freebie will be added to your freebie list and if they'll buy the \$1 upsell, they will be moved to your buyers list (you can easily set this up inside your [autoresponder](#) account). Of course you can then use your freebie seekers list to do [email swaps](#), send pay-per lead offers and targeted cpa offers to them.
- **A pay-per-lead or cpa offer** – self-explanatory.
- **Anywhere else online** – your latest blog post or video, your social media accounts or wherever else you want.

Free Traffic Forever?

I promised you that I'll share one cool secret that will basically give you all the free traffic that you'll ever need... so **here it is!**

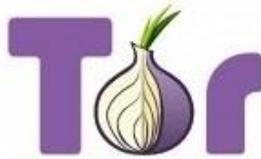

Going through the **200 sites** that you can choose from [HERE](#) will take you a little while (depending on how much time per day you want to dedicate to it).

So once you're **done** with all the sites, or if you'll get some good results with a particular site but will run out of free credits, it is time to work some magic 😊

Firstly you'll have to create **another Gmail account...** but this alone will get you nowhere since all of these sites are also **tracking** your IP address, to make sure that you only use your credits ONCE.

This is where our **secret tool** comes into play –

[The Tor Project Browser!](#)

A green banner with white and purple text. On the left, it says "Anonymity Online" in a large font, followed by "Protect your privacy. Defend yourself against network surveillance and traffic analysis." Below this is a purple button with a white onion icon and the text "Download Tor" with a small downward arrow. On the right, a white box contains three bullet points: "Tor prevents people from learning your location or browsing habits.", "Tor is for web browsers, instant messaging clients, and more.", and "Tor is free and open source for Windows, Mac, Linux/Unix, and Android".

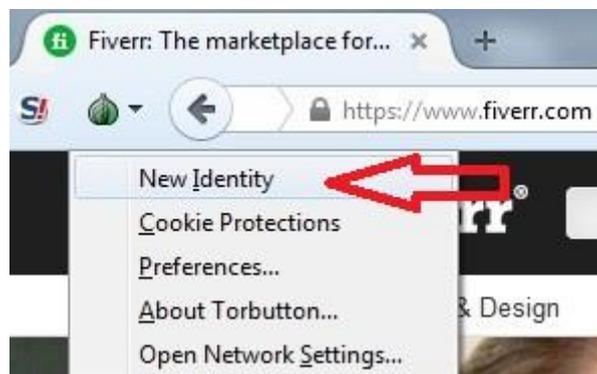

Anonymity Online
Protect your privacy. Defend yourself against network surveillance and traffic analysis.

Download Tor

- ▶ Tor prevents people from learning your location or browsing habits.
- ▶ Tor is for web browsers, instant messaging clients, and more.
- ▶ Tor is free and open source for Windows, Mac, Linux/Unix, and Android

The Tor Project Browser will allow us to use their network of computers located around the world to connect to internet using their **different IP addresses** from different countries.

You can change the IP that you're using with **one click** of the mouse, simply by choosing 'New Identity' from the drop down menu.

Each of the new accounts will have to be opened with your new Gmail address and a different IP address (using the Tor Browser).

Note – before opening each new account you can go to <http://www.whatismyip.com/> and check which is the country that you're connecting from.

Make sure to **write down** all of the email addresses and passwords to these new accounts.

IMPORTANT – each time you're login back in to the site of your choice, make sure to use the Tor Project Browser as well. If you will use the same IP as you use for your first account, they will flag you and won't let you use the credits.

Using the Tor Browser, you can go through the list of these 200 sites again using your 2nd Gmail account until you're done.

You can **keep opening** new Gmail accounts, signing up again and using the Free Credits **FOREVER!** 😊

That's it Baby!

All you need to do now is **implement** these strategies and see how your traffic numbers are skyrocketing (together with your income)!

The most important part of it all is **consistency** – make sending traffic to your offers a daily ritual...

Please **remember** that if you'll ever need help with anything, you can always email me at artofmarketing@live.com - I promise that I'll get back to you ASAP.

If you would like to **work with me One-on-One**, you can!

I have a [One-on-One Coaching Program](#) where I take you by the hand and make you a successful Internet Marketer.

If you **really** want to start making money online, that is your chance to work with someone that has already done it and can show you exactly what to do!

[Click Here to Enroll NOW](#)

And that's it! This is the method that has the potential to make you hundreds if not thousands of dollars 😊

Good luck and hope to hear from you soon!
